About This Game

Nick Bounty and the Dame with the Blue Chewed Shoe is a comedic spoof on classic film noir detective movies as well as a narrative driven adventure game inspired the classic adventure games of Lucas Art and Telltale games. It's a little bit Maltese Falcon, a little bit CSI, and a little bit Naked Gun. The story follows detective Nick Bounty and his quest to be taken seriously as a real detective. As the case unfolds, he becomes entangled in an absurd mystery that threatens to end his life... and his newly hired partner's too!

The Dame with the Blue Chewed Shoe is the third game to feature Nick Bounty as the down-on-his-luck detective, but you don't need to have played either of the first two games to enjoy this one. Each game is a stand alone story to be enjoyed on its own.

EVIDENCE!

Photo of Legs

She's got legs. But it doesn't necessarily follow that she knew how to use them. In fact, when I arrived at the crime scene, she wasn't using them at all.
